

The graph displays the relationship between the number of Tokens (x-axis) and two metrics: Baseline and Relative. The x-axis is labeled 'Tokens' and ranges from 0B to 1B. The y-axis represents the values of the metrics, ranging from 0.0 to 1.0. The Baseline metric (blue line) shows a steady decrease in value as Tokens increase, with a standard deviation band (light blue) that widens as Tokens increase. The Relative metric (red line) shows a similar trend but with a more pronounced decrease in value as Tokens increase, also with a standard deviation band (light red) that widens as Tokens increase. The graph includes a legend in the bottom left corner.
